

## Install the Cisco JVDI Client application

1. Open a browser (Chrome, IE, or Edge) and go to <https://vdi-setup.uwcu.org>
2. From the vdi-setup page, click on the link for **CiscoJVDIClientSetup-x86\_64.msi** to download the application file.
3. When the file has finished downloading, click **Open File** at the bottom of your browser window  
NOTE: a Cisco JVDI Client popup window will appear
4. From the Welcome to Cisco JVDI Client installer window, click on the **Accept and Install** button

5. A "User Account Control" popup window, will appear asking "Do you want to allow this app to make changes to your device?" Click on the **Yes** button.

- When the installation is completed, click on the **Finish** button.

NOTE: there is no additional setup needed for this application. The Jabber application on your virtual machine (VM) will communicate with this application on your physical machine to enable audio calls using Jabber as a “soft phone”.
